

SUSTAINABLE AND FUNCTIONAL PACKAGING

Bingo Australia is proud to introduce an award-winning paper packaging solution engineered to elevate the customer experience while driving cost savings for restaurant owners.

Why PleatPak?

If the burger matters, so does the packaging. The revolutionary PleatPak's proprietary pleated design keeps burgers portable and mess free. Burgers are wrapped perfectly, keeping them secure, warm, juicy and ready to eat. The precision-engineered pleats allow the right amount of moisture to escape and deliver a fresh, convenient and satisfying experience bite after bite.

The PleatPak achieves multiple benefits:

- **Hygienic design** - burger is fully contained for efficient service.
- **Cost effective** – PleatPaks offer direct and indirect savings. Fewer napkins are needed and less space is required for storage.
- **Minimise waste** – less material means savings in shipping, waste management and disposal, lowering costs and overall carbon footprint.
- **Reduced mess** – spills and drips are contained within the pleats, offering a portable, clean and enjoyable customer experience.
- **Freshness** – food quality is maintained as pleats allow just the right amount of moisture to escape so burgers stay warm without getting soggy.
- **Great marketing tool** – PleatPaks can be personalised to increase sales and enhance brand recognition.

PleatPaks Boxing – 4,000 PleatPaks per box (8 inners x 500 pieces).

PLEATPAK® - SUPPLIED BY BINGO AUSTRALIA PTY. LTD.

WRAPPING PROCEDURES

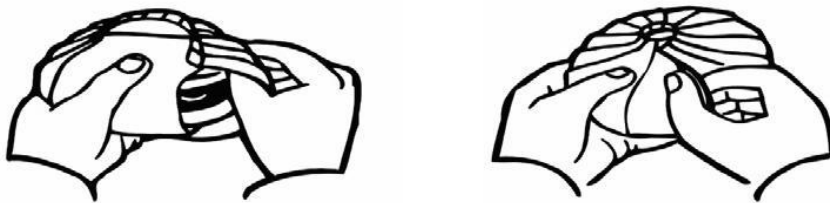

1 Open PleatPak and on the right side, place or build the burger on top 1/3 of the non-pleated prep sheet.

2 Fold the prep sheet and the pleat sheet over the burger and with your left hand, GENTLY cradle and hold the burger.

3 With the thumb and fingers of your right hand, grab the FIRST pleat and gently open the pleats to wrap closely around the burger.

4 When most of the pleats are opened around the burger, shift hand position to finish wrapping until the burger is fully covered and ready to serve.
